

Letter of Recommendation

September 23, 2019

Dear Sir/Madam,

We are very pleased to receive the support of Dipl.Ing (Univ) Barlian Sapta Putra, who has been teaching mathematics at our institute since 2017 to prepare our students for the entrance exam of the Studienkolleg in Germany

All of our students who have participated in his class have managed to enter the Studienkolleg in Germany. He doesn't teach the students to calculate numbers, but to solve the mathematical problem as German mathematics does. The result is a solid understanding of basic mathematics which they previously couldn't acquire at their school.

For all students / institutions that need to prepare for studies in Germany, we highly recommend the expertise of Mr. Barlian Sapta Putra

Best Regard,

**PT. NOBEL MANAGEMEN INDONESIA
